

Healing Trauma with IPET

Learn how to utilize IPET as a powerful framework for understanding and addressing the experiences and symptoms of individuals and groups affected by trauma.

This 4-hour workshop focuses on developing therapists' ability to conduct effective therapeutic intervention with Interpersonal Equine Therapy© (IPET) for clients who have experienced trauma. Participants will learn various treatment modalities and increase their understanding of the traumatic process of their client with the horse as a guide to perspective, orientation, and intervention with the IPET model.

Prerequisite: Introduction to Psychotherapy with IPET
